RFID Your Way

Self Loan Station V5

The LED Halo is simple and easy to customise to the library's required colours. The various components of the unit (i.e. DVD unlocker, payment methods and receipt printer) are set to light up to direct the patron's attention to each function. In standby mode, the LED Halo can simply be lit in the library's corporate colours.

FE Technologies' new V5 Self Loan Station comes with an exciting new look to complement any library environment. It is designed to check-out up to 15 items at a time, and a CCD barcode Scanner that reads barcodes from mobile devices or printed barcodes. A portrait-oriented 23" touchscreen displays multiple items without the need to scroll up or down with a blended LED Halo surrounding the unit that creates a completely work-flow integrated experience for the patron.

- Designed to look and function brilliantly in any library
- Portrait-oriented 23" touchscreen
- Check out up to 15 items at a time
- Blended LED Halo
- DVD unlocker and payment options
- CCD barcode Scanner

Technical Specifications

Flexible installation options – it can be installed as a free standing unit, back-to-back, or on a desktop.
