Secure External Return Chute

FE Technologies offers a Secure External Return Chute that provides a controlled environment for all after-hours returns. The Secure External Return Chute only allows items that are recognised by an RFID Tag to open the chute and accept the items to be returned.

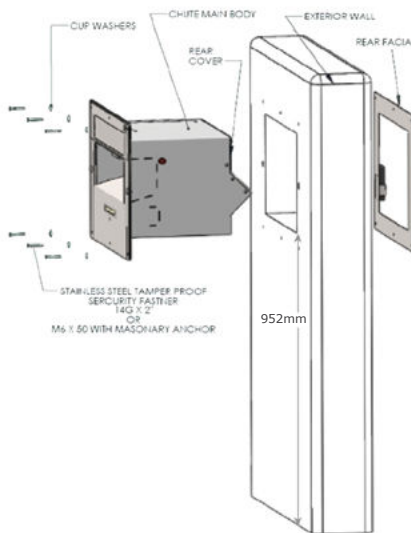

AS/NZS1428.2 compliant – when installed to listed specifications, reaching access to the chute opening is compliant with Australian Design for Access and Mobility Standard AS/NZS1428.2

The FE Technologies Secure External Return Chute is a robust, vandal resistant, stainless steel unit fitted with an RFID reader, and it can only be accessed using a library item with an RFID Tag.

The FE Technologies Secure External Return Chute has the following features:

The Secure External Returns Chute can be affected if placed too close to a Smart Bin or a Security Gate. Please see the Smart Bin and Security Gate Architect Information Packs for details.

- Tamper-proof fittings -- extremely robust design, ideal for external use
- Full electronic interlock feature when connected to an FE Technologies Returns Bin
- Open alarm -- alerts when chute is left open
- Rear cover deflection minimises the direct line-of-sight into the library, as well as drafts.
- Optional digital timer module
- Features an RFID Pad -- on which the library item must be placed against in order to activate the chute.
- Manufactured of stainless steel with coloured indicator lamps:
 - Blue – Chute ready for use
 - Green – Chute open
 - Red – Chute unavailable for use

We'd love to discuss library RFID and its benefits with you and your team. We can gladly set up a demonstration of our products at your premises, arrange a tour of our site, or a visit to one of our up and running RFID libraries.
