# 24/7 Check-in Chute with Receipt

The FE Technologies 24/7 Check In Chute is designed to be an asset to your library. Behind its clean and simple façade and ease of use is a round-the-clock, fully-automated, integrated item check-in that provides item safety, patron convenience, and a receipt. Simply open the chute, drop the books to be returned, and get the receipt. It's that easy.

FEATURES INCLUDE:

**Stainless steel construction** — the unit is made of exterior grade stainless steel for durability, vandal protection and corrosion resistance.

**Tamper-proof fittings** — used for securing the chute in position.

Rear cover deflection — design of the chute minimises the direct line-of-sight into the library, as well as drafts.

**Compact size** — wall cut-out required for installation is only 490mm x 328mm.

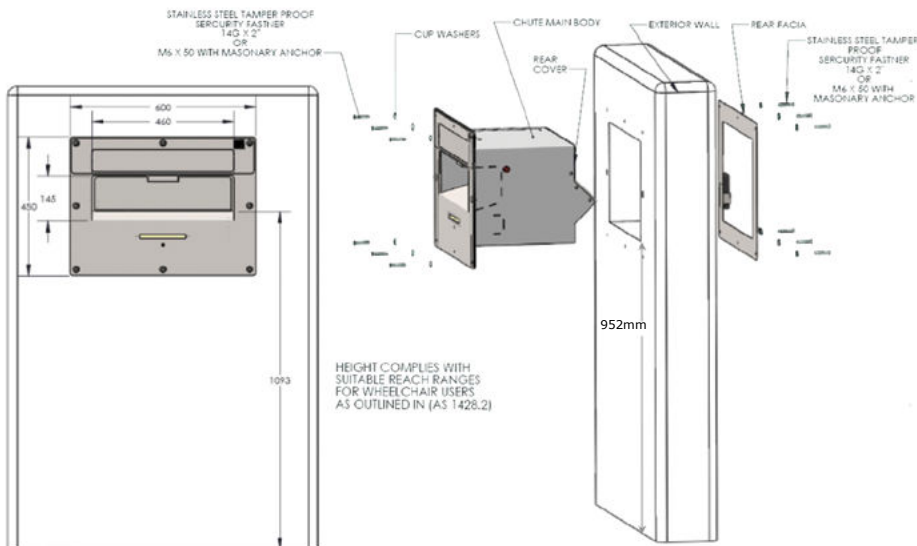

**Open alarm** — if the chute is left open, the system emits an audible alarm.

**Thermal receipt printer**

The FE Technologies 24/7 Check-in Chute with Receipt gives patrons the ability to return library items at any time of the day or night. Designed to be vandal-resistant and highly durable, the chute requires a library RFID item to be scanned for operation.

- Multiple items can be returned at a time, speeding up the returns process and putting an end to returns queues.
- Automatic itemised receipts mean patrons have proof of their returns, reducing customer service issues.
- Patrons will have their items checked back in instantly and the security on the items will be switched back to "on".
- Coloured indicator LEDs guide the patron through the returns process and staff access via an administration card makes receipt roll changing quick and easy.

AS/NZS1428.2 compliant — when installed to listed specifications, reaching access to the chute opening is compliant with Australian Design for Access and Mobility Standard AS/NZS1428.2.

We'd love to discuss library RFID and its benefits with you and your team. We can gladly set up a demonstration of our products at your premises, arrange a tour of our site, or a visit to one of our up and running RFID libraries.
