

FE Technologies
RFID Your Way

**Security Gates
Customisation**

FE Technologies understands the importance of branding your library and making sure our RFID equipment suits the look and feel of your architecture. To accommodate your design requirements, our Security Gates are designed to have customisable inserts installed in each panel on each side. So now you can design artwork specifically for your library or branch – you can match the colour to your corporate colours or the décor of your interior, or you can even place advertising for upcoming library events – a highly visible way to let your patrons know what's happening in your library.

We deliver your new gates with your chosen artwork already installed into the panels. At any future stage, you can change your own artwork quite quickly and easily yourself. We'll even print and send you the inserts.

Furthermore our gates can be placed securely in any configuration of library entrances and/or exits. The system can support a maximum of eight columns, providing seven aisles, covering 6.65 metres.

Our standard mounting is a floor ramp, but we offer several additional options including:

- Direct mount with aboveground cable ramps
- Direct mount with underground-capped trench
- Direct mount using buried cables

We'd love to discuss library RFID and its benefits with you and your team. We can gladly set up a demonstration of our products at your premises, arrange a tour of our site, or a visit to one of our up and running RFID libraries.
