Return Chute
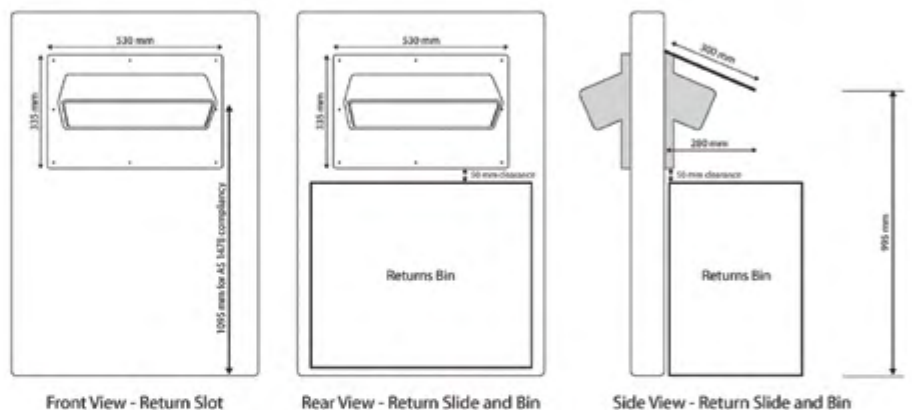

RFID that works.

FE TECHNOLOGIES

Ideal for use inside the library premises, the FE Technologies Internal Return Chute allows patrons to return multiple items whilst in the library. It features a unique inverted V-shape design internally, which maximises the read rate of returned items, allowing multiple items to be checked in. Using FE Technologies RFID Accelerate, a special software designed to make the read rate accurate and speedy, the Internal Return Chute is a cost-effective and highly effective returns product. When teamed with the Sort Assistant it will give you 100% returns accuracy and 100% check-in.

FE Technologies RFID Accelerate is the world-leading library system that's insanely fast and astonishingly accurate. A innovative structure created within our software that integrates with our RFID readers to allow much faster physical reads of RFID tags for a more efficient processing, faster delivery, and much better patron experience.

The FE Technologies Internal Returns Chute is part of FE Technologies suite of returns products that give libraries 100% check-in of returned items. The Internal Returns Chute is complemented by the installation of a Smart Bin and Sort Assistant to give you the ultimate in in-library returns.

Front View - Return Slot   Rear View - Return Slide and Bin   Side View - Return Slide and Bin
