

FE Technologies  
RFID your way

**Live  
Scanning  
Wand**

**The FE Technologies Live Scanning Wand is a shelf management tool that gives you live access to your LMS while performing stocktake tasks.**

**Save time and make your shelf management process much more efficient with the FE Technologies Live Scanning Wand.**

Consisting of a wireless lightweight handheld wand and tablet, the Live Scanning Wand uses Wifi to connect directly to your LMS (works with web-based LMS's and some android-based systems).

The device can be used to conduct a stocktake, and also to alert for exceptions items such as weed items, claimed returns, missing items etc; and can perform shelf ordering. All your shelf management processes can be performed with one lightweight and ergonomic device.

- The Live Scanning Wand does not require a data upload or download process – it uses the live realtime status of items in your LMS
- It will take you instantly to the appropriate LMS workflow when an exception item is detected to allow the operator to immediately update the LMS accordingly
- It will automatically update shelf location
- It will automatically update the "last seen" status of items

Transform your shelf management process today with the FE Technologies Live Scanning Wand.

*The Mobile Scanning Unit consists of the following components:*

- 2 sets of 3 Li-ion batteries, a battery charger and a USB cable
- Handheld wand – weighing 430g, with a scanning time of over 10 hours and an idle time of over 60 hours

*\*objects are not drawn to scale*

We'd love to discuss library RFID and its benefits with you and your team. We can gladly set up a demonstration of our products at your premises, arrange a tour of our site, or a visit to one of our up and running RFID libraries.
