BROWSE & BORROW OR COLLECT YOUR RESERVATIONS AT ANYTIME!

Showcase your library's collection and increase circulation at the same time! Our display lockers give libraries the ability to provide patrons with the dual ability of collecting holds and also borrowing from the locker collection 24/7. A transparent door allows all items in the locker to be viewed by patrons. Alternatively items in the locker automatically have a book jacket from google books or your book jacket provider attached, so patrons can also browse the items using system software.

Our Locker Units are available with up to 3 locker units per control unit. Each locker unit has 80 lockers, with three different sizes and is available in transparent or opaque doors (to hide holds). Our lockers come with an inbuilt lighting system which illuminates the items stored, creating a warm and friendly library image.

Display Locker has a 21" touch screen computer, a barcode reader and an RFID card reader. The Anytime Self-Service Software allows patrons to check out any holds or items.

Clean, classic design and superior durability make this display locker the perfect solution for library use. Constructed of solid steel and featuring a resistant finish, this locker features unobstructed access to your items.

Software

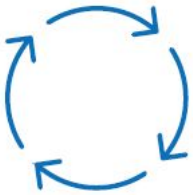
The simple holds pickup and browse and borrow workflows from the Anytime Self Service Software allows the patron to access items at a time and place that's convenient to them.

Extra Functionality

Librarians may load books in the Display Lockers when space is available, and these can be borrowed by any patron. A Display Locker helps increase circulation with this dual function.

Reporting

Reports can be accessed via Management Console for reporting requirements. Reports will show transaction history for the unit by the hour, day week and month.



Circulation

Increase access to your collection 24/7, and make it easier than ever to pick up holds and browse & borrow them. The display locker has a returns chute to make it convenient for customers to return items 24/7.

Customize

With our custom lockers, you can personalize the colours and branding to suit your library.

Management

Library staff will appreciate having quick and easy management tools that include reports to use with the lockers.

Anytime Self Service Software - give libraries the ability to provide patrons with 24/7 access to pickup holds, browse & borrow and return items.

FE Technologies

We'd love to discuss our RFID library solutions with your team. We can gladly set up a demonstration of our products at your premises, arrange a tour of our site, or a visit to one of our up and running RFID libraries.
